

IP address table of shared printers (Table 1)				
Physics professors printer	192.168.9.4			
Third floor physics professors printer-Over the guard	192.168.9.34			
office				
Third floor physics professors printer	192.168.9.29			
Math professors printer	192.168.9.6			
Chemistry professors printer	192.168.9.7			
Earth science professors printer	192.168.9.9			
IT professors printer	192.168.9.30			

Please use the following guide to use the shared printer in each section:

Please check your computer's IP address before installing the printer. It should look like as follows (based on your section):

IP addresses allowed to use the printers of each section (Table 2)				
Physics professors 192.168.14.X				
Math professors	192.168.11.X			
Chemistry professors	192.168.17.X			
Earth Sciences professors	192.168.50.X, 192.168.51.X			
IT professors	192.168.11.X			

\*\* You can see your IP address in the CMD section of your computer by typing the ipconfig command.

Note that, while installation, the printer driver may not be automatically detected by your Windows and you will see a window as shown below instead of the top window, which you can select the printer brand from the left menu and the printer model from the right menu. If you do not find the printer

model from the menu on the right, download the driver with the driver and install it. (It is worth mentioning that most printers' drivers are available in drive Y)
